- Special issue should be deal with more focused topics with high current interest falling within the scope of the journal in which they are published. Contents of special issue should be organized by recognized experts in the area and attract articles of the highest quality. Proposals for Special Issues

should be submitted by the Lead **Guest Editor** of the Special Issue and should include the following:

- A suggested title for the Special Issue
 - Aims and Scope along with an overview of the Special Issue's intended focus and a list of the topics to be covered
 - A list of Guest Editors who will join the Lead Guest Editor in managing the Special Issue, including their names, emails, affiliations, and a short biography (one paragraph) of each of the Guest Editors
 - A proposed timeline and schedule which includes:
 - ❖ Deadline for submission
 - ❖ Tentative publication date
-
- Along with proposal of special issue leading guest editor should provide a Call-for-Papers for the Special Issue which will be posted online along with the proposal of special issue.
 - Special Issues are made freely available online to all interested readers leading to the maximum possible dissemination and recognition within the scientific community.
 - The peer reviewed of submitted manuscript will be managing by the editorial team and guest editor of special issue. The Guest Editor handling the manuscript will then need to assign it to external referees for peer review. The Guest Editor should assign a minimum of 2 and a maximum of 4 independent external referees to each paper, and this should be done within a maximum of 2 week from the time he/she has received the manuscript. Reviewers are then expected to submit their reports within a maximum of 3 weeks.
 - The Guest Editor reviews the revised manuscript after the minor changes have been made by the authors. Once the Guest Editor is satisfied with the final manuscript, the manuscript can be accepted.
